Slide #: 1 Program: Storyline Bats Assessment Slide Title: Scenario Time!

USER SEES

Half the screen has text with other half filled by picture of bat. Bat has callout shape (button) that says “Let’s go!”

USER HEARS

none

GRAPHIC ASSETS

Photo of Colorado species of bat

ON-SCREEN TEXT

You’ve learned the bat basics — now let’s see how you handle the real-world stuff.

Each question drops you into a quick bat-in-the-house moment.

Pick the safest move for you and the bat.

Ready to play?

ADDITIONAL NOTES

Create hover state for button

Change state to hover

Jump to slide, next slide, when button is clicked

USER INTERACTION

Hover state button

User clicks button to advance to the next slide

Slide #: 2 Program: Storyline Bats Assessment Slide Title: Scenario 1

USER SEES

Scenario 1 title with text just below it. Picture fills up most page with outline around the bat and pointer icon to indicate that user should click on the bat to respond to the question.

USER HEARS

none

GRAPHIC ASSETS

Generate a realistic AI image of a child sleeping in a bedroom and a bat flying around.

Pointer icon

ON-SCREEN TEXT

You discover a bat flying around your child's bedroom. The child was asleep in the room before you entered. What do you do?

USER INTERACTION

Hover state over hotspot

User clicks hotspot (over bat) to show options layer. User will click answer and connected feedback layer will appear.

ADDITIONAL NOTES

Make hover state for hotspot (over bat)

Create 4 layers & convert to free-form pick one.

1) Options

Try to catch the bat with gloves

Remove the child and call wildlife officials

Open all windows in the house

2) A response incorrect: Trying to catch me increases risk for you AND me! Try again.

3) B response correct: Removing your child and calling wildlife officials is the safest response. Good job!

4) C response incorrect: That might trap me deeper in the house! Try again.

Slide #: 3 Program: Storyline Bats Assessment Slide Title: Scenario 2

USER SEES

Scenario 2 title with text just below it. Picture fills up most page with outline around the bat and pointer icon to indicate that user should click on the bat to respond to the question.

USER HEARS

none

GRAPHIC ASSETS

Generate a realistic AI image of a couple sitting in their living room and a bat flying around them.

Pointer icon

ON-SCREEN TEXT

A bat is flying in your living room. No one was sleeping, and no pets or children were left alone with it. What do you do?

USER INTERACTION

Hover state over hotspot

User clicks hotspot (over bat) to show options layer. User will click answer and connected feedback layer will appear.

ADDITIONAL NOTES

Make hover state for hotspot (over bat)

Create 4 layers & convert to free-form pick one.

1) Options

Chase the bat toward the exit

Open every door in the house

Close interior doors and open one window

2) A response incorrect: Chasing me increases stress and risk. Try again.

3) B response incorrect: Opening every door can confuse me! Try again.

4) C response correct: Providing me with one clear exit is the safest and most effective method. Good job!

Slide #: 4 Program: Storyline Bats Assessment Slide Title: Scenario 3

USER SEES

Scenario 3 title with text just below it. Picture fills up most page with outline around the bat and pointer icon to indicate that user should click on the bat to respond to the question.

USER HEARS

none

GRAPHIC ASSETS

Generate a realistic AI image of a bat laying on the floor of a hallway.

Pointer icon

ON-SCREEN TEXT

You find a bat on the floor of your hallway. It isn't flying and appears injured. What do you do?

USER INTERACTION

Hover state over hotspot

User clicks hotspot (over bat) to show options layer. User will click answer and connected feedback layer will appear.

ADDITIONAL NOTES

Make hover state for hotspot (over bat)

Create 4 layers & convert to free-form pick one.

1) Options

Try to move it outside with a towel

Turn off the lights and wait for it to fly away

Call wildlife officials and keep your distance

2) A response incorrect: Towels and tools can injure me!

Try again.

3) B response incorrect: I can't recover from dimmed lights.

Try again.

4) C response correct: Correct! An injured bat should only be handled by professionals.

Slide #: 5 Program: Storyline Bats Assessment Slide Title: Scenario 4

USER SEES

Scenario 4 title with text just below it. Picture fills up most page with outline around the bat and pointer icon to indicate that user should click on the bat to respond to the question.

USER HEARS

none

GRAPHIC ASSETS

Generate a realistic AI image of a dog sitting in a room and a bat flying around.

Pointer icon

ON-SCREEN TEXT

Your dog was alone in a room where a bat was flying. You didn't see any contact, but you're unsure what happened. What do you do?

USER INTERACTION

Hover state over hotspot

User clicks hotspot (over bat) to show options layer. User will click answer and connected feedback layer will appear.

ADDITIONAL NOTES

Make hover state for hotspot (over bat)

Create 4 layers & convert to free-form pick one.

1) Options

Remove the dog, close the door, and call wildlife officials

Try to catch the bat to check its health

Assume everything is fine if the dog looks normal

2) A response correct: That's correct! Exposure can't always be seen.

3) B response incorrect: Catching me is unsafe. Try again.

4) C response incorrect: Assuming I am safe is risky.

Try again.

Slide #: 6 Program: Storyline Bats Assessment Slide Title: You Did It!

USER SEES

Slide title with text just below it. Horizontal picture fills up half the page.

USER HEARS

none

GRAPHIC ASSETS

Generate a realistic AI image of a bat flying around a Colorado-style house at dusk.

ON-SCREEN TEXT

You just navigated four batty scenarios like a pro.

Stay calm, choose one exit, skip the chasing, and call the experts when things get weird.

You're officially ready for any surprise bat appearance in your home.

Nice work!

ADDITIONAL NOTES

Since the e-learning is in Rise and this will be embedded, users will be able to continue working in Rise as soon as they reach this screen.
