Mandatory Reporting Online

Lindsey King 2026

Project Information	
Project Title	Mandatory Reporting for Online Student Interactions
Project Purpose	Problem Statement/Identified Performance Gap: School staff in Colorado are legally required to report suspected child abuse and neglect. However, virtual staff are unsure how to interpret *digital* red flags and hesitate to report. This leads to delayed or missed reports, increasing student risk and district liability.

Audience, Goals & Objectives	
Target Audience	All high school staff who interact with students online, including teachers, counselors, coaches, paraprofessionals, and office staff.
Project Goal	The module aims to ensure staff recognize online indicators of abuse or neglect, increase reporting accuracy and timeliness, reduce liability by aligning staff behavior with Colorado law, strengthen student safety in virtual environments, and build staff confidence in handling digital disclosures.
Learning Objectives	After completing this training, learners will be able to… • Identify at least five online indicators of potential abuse or neglect • Select legally appropriate responses to online disclosures with 90% accuracy • Distinguish between observing, documenting, consulting, and reporting in virtual contexts • Report all suspected abuse or neglect to law enforcement or local county DHS within required timeframes.

Mandatory Reporting Online

Lindsey King 2026

Design Approach	
Format	Self-paced, scenario-based e-learning following an individualized instruction approach (test first)
Flow/Sequence	1. Title & Intro Narration ⟶ 2. Baseline Survey ⟶ 3. Scenarios 1–5 (With Compliance Summaries) ⟶ 4. 5-Question Final Assessment ⟶ 5. Resources ⟶ 6. Post-Module Survey ⟶ 7. Certificate Download
Technologies/Approaches	The module will be developed using Storyline, Rise, or Captivate and will incorporate branching logic, chat/email/video simulations, optional help and hint features, and audio dialogue.

Implementation & Measurement	
Context	The module will be delivered through the district LMS, required annually at the start of the school year, self-paced (20–30 minutes), and accessible on desktop and mobile devices.
Outcomes Assessment	Strategic outcomes will be measured through reductions in delayed reports, improvements in reporting accuracy, and increased staff confidence based on pre/post surveys. Learning outcomes will be assessed through a final scenario-based evaluation in which learners correctly identify reasonable suspicion in at least four out of five new online scenarios and achieve a score of 90% or higher.
Resources Needed/Available	Resources include Colorado DHS guidelines, district reporting policies, SME access, an authoring tool license, and LMS hosting.
